DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

For a claim to be statutory under 35 USC 101 the following two conditions must be met:

1) In the claim, the practical application of an algorithm or idea result in a useful, concrete, tangible result, AND

2) The claim provides a limitation in the technological art that enables a useful, concrete, tangible result.

As to the technology requirement, note MPEP Section iV 2(b). Also note In Re Waldbaum, 173USPQ 430 (CCPA 1972) which teaches “useful arts” is synonymous with “technological arts”. In re Musgrave, 167USPQ 280 (CCPA1970), In re Johnston, 183USPQ 172 (CCPA 1974), and In re Toma, 197USPQ 852 (CCPA 1978), all teach a technological requirements.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3628

4. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being unpatentable over Huang et al (US 5,953,707)

Huang et al teach a method of facilitating trading among a set of processes, comprising:
automatically operating at least one of the processes according to an order processing methodology by

- retrieving a decision table having at least two rules specifying at least one of a discovery strategy and an order handling strategy, each rule having at least one condition and at least one action to be taken when the condition is satisfied (10), and
- automatically evaluating whether the at least one condition for each of the rules is satisfied, and for each of the rules having a satisfied condition, automatically configuring the at least one process to act on the at least one action (figs. 3,7; col.8, line 30-col.14, line 35).
- wherein the at least one process is a trading process (see trade inventory);
- wherein the at least one process is a market process (abstract);
- wherein the at least one condition is based on order characteristics (see supply requirement planning);
- wherein the at least one condition is based on market characteristics (“Top-Down Forecasting. The objective of the Top-down forecasting is to develop a product centric sales forecast based on historical demand data and industry analysis that accounts for market-wide trends”).
- wherein the automatically evaluating includes assigning a value to a parameter (12); and
- wherein the automatically evaluating includes transferring to another rule (10);

Art Unit: 3628

· wherein at least one of the rules also specifies a time for acting on its at least one action (10).
